

DRAIN NET

A dramatic breakthrough that helps simplify your shower drain maintenance.

Tired of "Hairy Drain" Problems?

- Slow or no drainage - Once hair and scum leave the shower drain they regroup to form large blockages further inside your home's plumbing system.
- Flooding - Shower overflow can create dangerous conditions such as slippery tiles and cause costly damage to floors and ceilings
- Dangerous drain cleaning chemicals - Every application of drain cleaning chemicals attacks and corrodes your piping system. In addition, these same chemicals attack and kill the waste eating bacteria in your septic system
- Leaking pipes and traps - Once corrosion begins, water damage to walls, floors and ceilings caused by leaking pipes is simply a matter of time. Professional pipe cleaning and repairs will far outway the minimal cost of a disposable drain protector. An ounce of prevention is worth a pound of cure!

The Solution

Simply remove 2 screws and drop our Drain-Net Drain Protector into your shower floor drain. This patented product will allow water to flow through while it captures every bit of hair, solid, soap scum, etc. Drain-Net will also be beneficial in helping to capture loose jewelry, contacts, hair clips & ties, etc. Nothing will escape through our net except waste water. (Tub Drain-Nets are also available and adjust to fit your tub drain.)

Drain-Net lasts approximately 2 to 3 months in the average shower. Simply remove when full and replace with a new Drain-Net.

disposable floor drain strainers

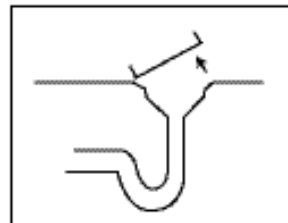

1-800-407-3726

US Patent # US 6,315,896 81
